# INDEX

ABSTRACTS, Biochemistry, 80.
——, corrections, 173.
——, Immunology, 165.
——, Nutrition, 151.
——, Pathology, 144.
——, Pharmacology, 110.
——, Physiology, 1, 173.
Anticoagulant 3,3′-methylenebis(4-hydroxycoumarin), 176.
Atlantic City meeting, 283.

BALLISTOCARDIOGRAPH in measurement of cardiac output, 195.
——, low frequency, critically damped, 201.
BESSEY, O. A. See LOWRY AND BESSEY, 268.

CARDIAC output, 183.
—— ——, by catheterization technique, 215.
—— ——, development of physiology of, 183.
—— ——, measurement of, by right heart catheterization, 207.
—— ——, methods, 212.
Cleveland 1945 meeting, cancellation of, 1.
CORI, C. F., Chairman, Symposium: Formation of disaccharides, polysaccharides and nucleosides, 226.
——. See CORI, SWANSON AND CORI, 234.
CORI, G. T., M. A. SWANSON AND C. F. CORI. The mechanism of formation of starch and glycogen, 234.
COURNAND, A. F., Chairman, Symposium: Cardiac output, 183.
——. Measurement of the cardiac output in man using the right heart catheterization, 207.

DIETS, techniques for studying, 253.
Disaccharides, polysaccharides and nucleosides, formation of, 226.
DUODOROFF, M. On the utilization and synthesis of sucrose and related compounds by some microorganisms, 241.

GOLDSMITH, G. A. Nutrition studies in the New Orleans area, 263.

HAMILTON, W. F. Notes on the development of the physiology of cardiac output, 183.
HASSID, W. Z. Recent advances in the molecular constitution of starch and glycogen, 227.

INTERIM report, American Institute of Nutrition, 175.
—— ——, American Physiological Society, 221.
—— ——, American Society of Biological Chemists, 174.
—— ——, American Society for Pharmacology and Experimental Therapeutics, 174.
IVY, A. C. A potential physiological contribution to the prevention of "peptic ulcer" in man, 222.

KALCKAR, H. M. Enzymatic synthesis of nucleosides, 248.
KING, C. G., Chairman, Symposium: Nutrition surveys, 252.

LINK, K. P. The antiocoagulant 3,3′-methylenebis(4-hydroxycoumarin), 176.
LOWRY, O. H. AND O. A. BESSEY. Microchemical methods for nutritional studies, 268.

McMICHAEL, J. Notes on cardiac output methods, 212.
Members, 306.
——, deceased, 376.
——, honorary, 306.

NICKERSON, J. L. The low frequency, critically-damped ballistocardiograph, 201.
Nucleosides, enzymatic synthesis of, 248.
Nutrition appraisal, public health, 258.
——, prenatal, 271.
——, studies in New Orleans area, 263.
—— surveys, 252.
Nutritional studies, microchemical methods for, 268.

"PEPTIC ulcer" in man, prevention of, 222.

RICHARDS, D. W., JR. Cardiac output by the catheterization technique in various clinical conditions, 215.

SEBRELL, W. H. See WILKINS AND SEBRELL, 258.
Starch and glycogen, formation of, 234.
—— —— ——, molecular constitution of, 227.
STARR, I. Present status of the ballistocardiograph as a means of measuring cardiac output, 195.
STIEBELING, H. K. Techniques of finding out what people eat, 253.
STUART, H. C. Findings on examinations of newborn infants and infants during the neonatal period which appear to have a relationship to the diets of their mothers during pregnancy, 271.
Sucrose and related compounds, utilization and synthesis of, by microorganisms, 241.
SWANSON, M. A. See CORI, SWANSON AND CORI, 234.

WILKINS, W. AND W. H. SEBRELL. Developments in public health nutrition appraisal, 258.
